PROFESSIONAL SUMMARY

Java backend engineer (MCA, 2026) with hands-on experience building full-stack and ERP-style applications using Spring Boot, Hibernate, and MySQL. Recently extended this foundation into Generative AI by independently designing and shipping an agentic, multi-agent Spring Boot + React application powered by the Claude API. Comfortable working across the stack — from REST API design and relational data modeling to LLM-integrated backend architecture — and quick to pick up new tools through self-directed learning.

TECHNICAL SKILLS

Languages: Java, Python (working), SQL, JavaScript, HTML, CSS

Backend & Frameworks: Spring Boot, Hibernate, JDBC, JSP, Servlets, REST APIs

AI / GenAI: Claude API (Anthropic SDK), Agentic multi-agent architectures, FastAPI, LangChain fundamentals

Database: MySQL, SQLAlchemy

Cloud & DevOps: Docker, Kubernetes (fundamentals), CI/CD concepts, AWS/GCP/Azure fundamentals

Tools & Practices: Git, GitHub, Maven, VS Code, OOP, Collections Framework, MVC Architecture, DSA

EXPERIENCE

Web Development Intern — Solnet.co.in

- Maintained and updated live client websites, translating business requirements into shipped UI changes and bug fixes.
- Coordinated directly with clients and internal team members to scope requirements and deploy updates on schedule.
- Supported website testing, maintenance, and deployment cycles as part of a small delivery team.

Cybersecurity Analyst — Virtual Experience Program — Tata (Forage) *May 2024*

- Completed simulated threat detection, incident response, and risk assessment exercises modeled on real analyst workflows.
- Evaluated security scenarios and proposed mitigation strategies aligned with standard data protection frameworks.

PROJECTS

ResumeFit AI — Resume-to-Job-Description Fit Analyzer — *Spring Boot, React, Claude API (Anthropic SDK), PDFBox*

- Designed and built a **4-agent orchestration pipeline** (Extractor, JD Analyzer, Matcher, Advisor) that parses a resume and job description and returns a structured fit score with actionable gap analysis.
- Implemented PDF resume ingestion using **PDFBox** and built a custom React front end with an instrument-panel-style fit-score gauge for visual feedback.
- Shipped a parallel **Python rewrite** (FastAPI, SQLAlchemy, Anthropic SDK, Streamlit) of the same agent pipeline to validate the architecture across stacks.

Garage ERP System — *React.js, JavaScript, CSS*

- Built a Garage ERP platform covering customer management, vehicle records, job cards, inventory, billing, insurance, and licensing.
- Implemented end-to-end workflows for customer registration, job card creation, invoice generation, inventory tracking, and payments.
- Built responsive dashboards with revenue analytics, service history tracking, and notification/search functionality.
- Designed a modular architecture intended to support future backend and database integration.

GeeksforGeeks Clone Website — *Java, HTML, CSS, JavaScript, MySQL*

- Built a responsive full-stack educational platform with user authentication and article management, backed by a MySQL database.
- Applied MVC architecture principles throughout to keep the codebase maintainable and scalable.

To-Do List Application — *Java, Collections Framework, File Handling*

- Built a command-line task manager supporting add, update, delete, and status-tracking operations.
- Used the Java Collections Framework with file-based persistence for storing task state between sessions.

EDUCATION

Master of Computer Applications (MCA) — Ramdeobaba University, Nagpur *2024 – 2026* | CGPA: 7.3

Bachelor of Computer Applications (BCA) — City Premier College, Nagpur *2020 – 2023* | CGPA: 7.30

Higher Secondary Certificate (HSC) — Kids Mentor Global School, Nagpur *2019 – 2020* | 60.15%

Secondary School Certificate (SSC) — Saraswati Vidyalaya, Nagpur *2017 – 2018* | 85.40%

CERTIFICATIONS

- AI Tools Certification — GeeksforGeeks
- Cybersecurity Analyst Virtual Experience Program — Tata (Forage)
